

Weekly Progress

Sam

- Changed to software Slave Select instead of hardware Slave Select
- Wrote function to initialize sensor and read passive targets
- MOSI, CLK, SS bitstream are all correct on logic analyzer
-

Bowen

- Wifi and tcp connection on CC3220
- Server logs users in and out of Room
- Server changes capacity based on Log in
- Reset Capacity from CC3220
- Started Android App

Problems

- One of our boards is bricked
- CCS IDE doesn't not compile anymore
- Sensor does not ACK

My Bitstream

Application Note
